

EVENT FINDER WITH NAVIGATION SYSTEM
AND DISPLAY METHOD THEREOF

Abstract of the Disclosure

5 An event finder on a remote terminal for finding events
such as movies, sports, weather, news and the like through a
remote terminal such as a lap top computer, personal digital
assistant (PDA) and vehicle navigation system with
positioning capability. The event finder includes a display,
a data terminal connected to the display for processing data,
10 a navigation system for determining position of a user and a
destination, and a transceiver for receiving event data from
an event data server through a communication system. The
data terminal associates the event data from the event data
server with position information from the navigation system
15 and retrieves event information based on a selection method
specified by the user.
